

# Bractlet Gateway Installation Guide

## Location

In order to maximize power meter and cellular connectivity, the gateway should be installed in a location that meets the following criteria:

- Within 50 feet of the main BAS network switch.
- Free and clear of obstructions, preferably up high on a wall.
- No metal objects in the vicinity (electrical panels, control boxes, etc.)
- Preferably low-traffic, as to avoid the device getting knocked off the wall.

## Install Process

- Open the front of the gateway enclosure by unscrewing the 4 screws and remove the power cord.
- Plug in the power cord and CAT 5 cable by feeding their cables through the hole at the bottom of the enclosure.
- Mount the gateway in the location found above.
- Plug the CAT5 cable into the BAS network.
- Plug the gateway power cord into a standard 120V outlet.
- Before closing the gateway enclosure, ensure the following:
  - Blue light on the gateway is on
  - Blue light on the cellular modem is on
  - Indicator lights on the CAT 5 ethernet port are on
